Cobwebb Document Management
makes the link between your business's documents and the IBM i, keeping both securely at the heart of your business.

The comprehensive document management system for IBMi

COBWEBB DOCUMENT MANAGEMENT // from Cobwebb Communications Ltd. comprises a powerful set of tools that perform two critical processes - The reformatting, distribution and archiving of IBM i generated documents, combined with archiving scanned images and user generated documents such as emails, spreadsheets, etc.

COBWEBB DOCUMENT MANAGEMENT is a modular software application designed specifically for operating on the IBM i mid-range server.

Cobwebb Document Management Modules

—

CPPD PRINT // module facilitating PCL, AFP, IPDS, SCS, PDF direct thermal and barcode printing. Utilises IBM's printing strategy, host print transform, etc. for LAN, TWINAX connectivity, etc.

—

COBWEBB FAX // module facilitating faxing from IBM i – comprehensive system with optional web browser interface.

—

COBWEBB EMAIL // module facilitating email from IBM i - comprehensive system with optional web browser interface.

—

COBWEBB FILE // module generating a file (PDF, SCS, DOC, CSV, TXT) for distribution to IFS, Windows or other Network attached folder, FTP, etc.

—

COBWEBB XML // module facilitating outbound XML transmission. Map spooled files according to schemas, then FTP or email resulting XML.

PRODUCT // COBWEBB DOCUMENT MANAGEMENT

—

COBWEBB DOCSTORE // module facilitating C.O.L.D archiving on IBM i. Any IBM i generated document or report can be formatted, indexed and stored on IBM i, and searched for/retrieved via a web browser.

—

COBWEBB DOCSTORE CAPTURE // module facilitating full document archiving and retrieval – supports scanning OCR, ICR, Windows document import, IBM i document archiving. Documents can be searched for / retrieved via a web browser, windows client, 5250 client access emulation session.

—

COBWEBB EPORTAL // secure digital gateway that enables document workflows between multiple parties, allowing suppliers, customers and employees to retrieve and access documents online when needed. This self-service model reduces administration costs and makes accessing data more efficient for all involved. An extension to **COBWEBB DOCSTORE**, the ePortal gives **COBWEBB DOCUMENT MANAGEMENT** customers the ability to share documents with the outside world.

—

COBWEBB MOBILE // Android-based toolset that enables the capture of data from remote locations and streams it directly back into your business system for instant retrieval when needed. The **COBWEBB MOBILE** platform enables processes such as proof of delivery, stock picking in the warehouse and engineer visit reports. **COBWEBB MOBILE** integrates seamlessly into **COBWEBB DOCUMENT MANAGEMENT** System.

Pre-reqs

—

COBWEBB DESIGNER // PC GUI application facilitating the construction of design and distribution logic. Fully integrated with Cobwebb Document Management on IBM i.

—

COBWEBB SERVER // base software product (required). Facilitates the reformatting and merging of spooled file data with graphical templates, logos, etc. Facilitates the retrieval of additional information from the DB2 database. Facilitates the distribution of resulting documents.

COBWEBB DOCUMENT MANAGEMENT leverages your existing investment in the IBM i platform. No additional servers are required, no additional databases to maintain. In fact, once the back up of the IBM i is completed, all your business critical documents are backed up as well, thus reducing your business's compliance risks.

Cobwebb Document Management makes the link between your business's documents and the IBM i, keeping both securely at the heart of your business.
